

Vacancy Laboratory Technician

We are recruiting a Laboratory Technician to work within a large Manufacturing business. We are looking for an enthusiastic self-starter with a dynamic approach to their role and able to work as part of an established team.

This is a permanent position working Monday - Friday (37.5 hours)

Main Duties and Responsibilities

- Chemical condition monitoring and analysis of chemical processes throughout the site including auditing and reporting.
- Preparation of samples for microstructure analysis, conducting analysis of materials.
- Functional testing for compliance of chemical processes.
- Supporting investigations locally and with external support to determine potential failure modes.
- Working collaboratively with other teams on projects related to the job function.

Experience, skills and knowledge required for the role:

- Suitable degree level qualification in Chemistry (Post graduate applicants are welcome to apply).
- Basic understanding of manufacturing techniques related to industrial production.
- Knowledge of chemical processes (analytical chemistry), washing, cleanliness, tribology, non-destructive/destructive testing, lubrication systems would be an advantage.
- Positive attitude, team player with good communication, analytical and IT skills.
- Use of laboratory equipment, optical microscopy, SEM, FTIR and others would be an advantage.

To apply for this role, please submit your CV and covering letter to careers@bardenbearings.co.uk

Closing date: 18th September 2020
